The app has just been updated to a new version that can be used for free during the 30-day period – after that you need to purchase the full license. The installation file has decreased a lot compared to the previous version, but it remains large, so start downloading while you're finished reading this text. The program is available in 32-bit or 64-bit versions, so download the version that is compatible with the version of your operating system. This package includes all Corelpackage applications: CorelDRAW, Corel Photo-Paint, Corel PowerTrace, Corel Connect, Corel Capture, Corel Website Creator, PhotoZoom Pro3, and ConceptShare. You choose which ones to add to your computer when you begin installing this suite. Far beyond editing, CorelDRAW Graphics Suite offers a comprehensive database for you in addition to tools for the most diverse functions of digital creation, from illustration to image editing, from screen capture to website development for the Internet. There are 10,000 images and clipart, 2,000 high-resolution digital photos, 1,000 OpenType fonts, and more. In this new release, the Content Organizer (Corel Connect) has been refined to provide access to all additional content included in the package. It's also easier to search for even more content in Corel's online providers, and secures a world of options you can work with. Another novelty in CorelDRAW is an interactive content center that lets you explore an online database and share vector, bitmap, and gradient fills with the entire community of program users. To Getting access to your projects, you can connect anything to Microsoft OneDrive by sharing your data data retouchedCorelDRAW interface has also won some touch-ups and is even better: already on the splash screen you can see some news, such as the ability to access online tutorials, check for updates and also select a desktop. By the way, the application's desktops are more diverse and work similarly to features of the genre that exists in Photoshop, and Illustrator.To leave the user interface in their own way, CorelDRAW now offers a simple customization system – so you can customize the Toolbox, docking windows, and property bars as needed. Processing multiple documents now has a docking feature, and the program also allows you to work with multiple concurrent documents and organize everything into individual tabs. In addition, support for Windows 8 and 10 has been improved, and the latest update offers a number of new features. Corrections and other improved features have been added and you check the huge list of new or incremented things by clicking on this link (PDF document). The increasingly intelligent CorelDRAW Graphics Suite brings the LiveSketch tool to one of its biggest innovations of recent times. The feature uses artificial intelligence and machine learning mechanisms to provide designers with a differentiated experience. This function is able to interpret and convert drawn strokes, from scribbles to brush strokes and crossed lines, into vector curves. This allows you to create sketches much more dynamically. Finally, it is worth noting that the feature is also compatible with devices equipped with touch screens. Touch.
